

Matched schedule, repeatability, and event alignment are distinct

Schedule matching

Were declared
rows matched?

Boundary seed, context,
order, seat, and limits

permits: Matched-schedule
attempt

Execution repeatability

Does each arm
repeat?

A/A trace-projection digest
and byte count across profiles

permits: Bounded within-arm
repeatability

Semantic event alignment

Did shared events receive
equal random values?

Stable event IDs plus
logged event/value pairs

permits: Event-aligned coupling
within the ontology
