

Figure Review Packet

Eight figures generated from machine-readable sources. Review labels, scope, and interpretation. This packet does not authorize submission.

Decision status: NOT_READY_DO_NOT_SUBMIT

Initials after every page only if you can explain the review question in your own words.

Figure 1 - Claim branches

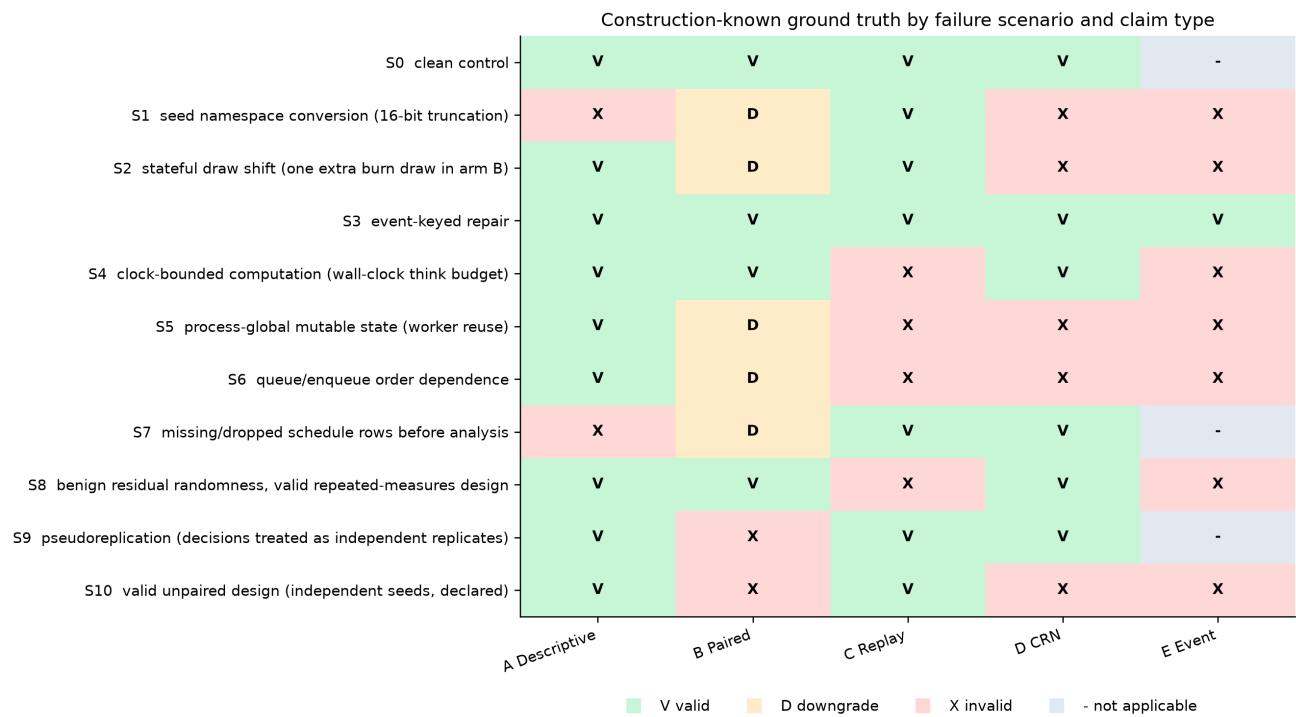

Branches are alternatives by claim objective - not a cumulative ladder.

Review question: Does this clearly show alternatives rather than a cumulative ladder?

Reviewer initials: _____

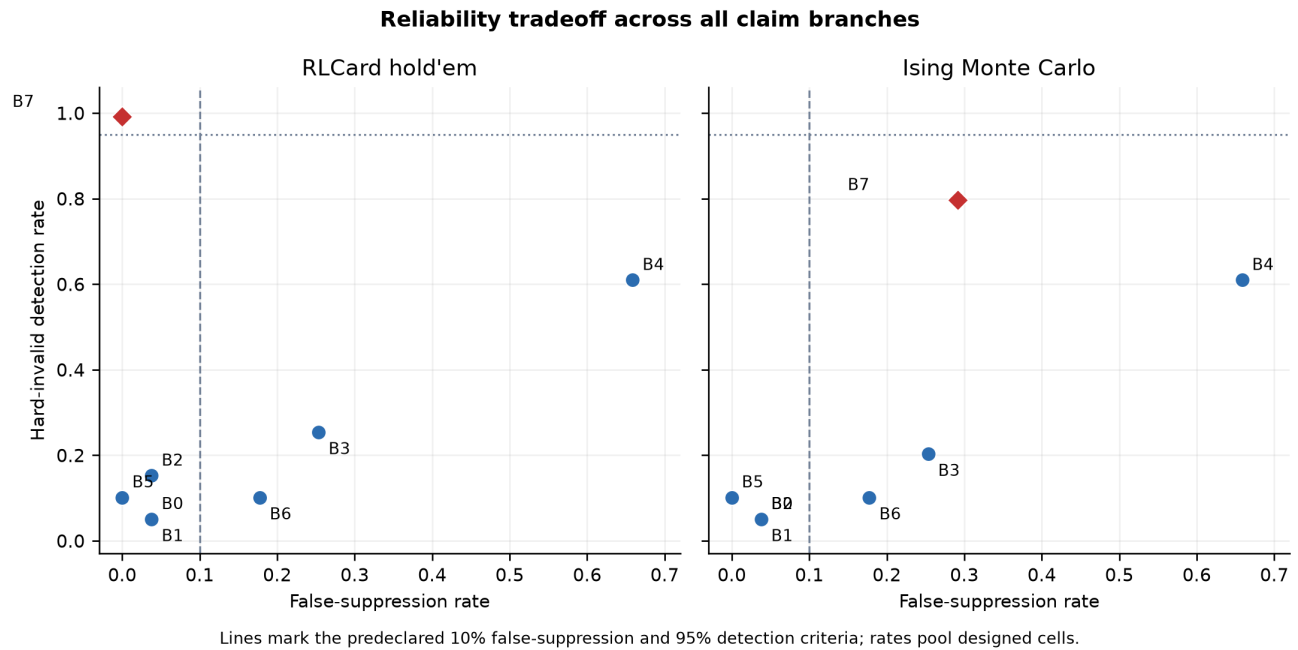

Figure 2 - Failure/claim matrix

Review question: Are VALID, DOWNGRADE, INVALID, and not-applicable states understandable without color?

Reviewer initials: _____

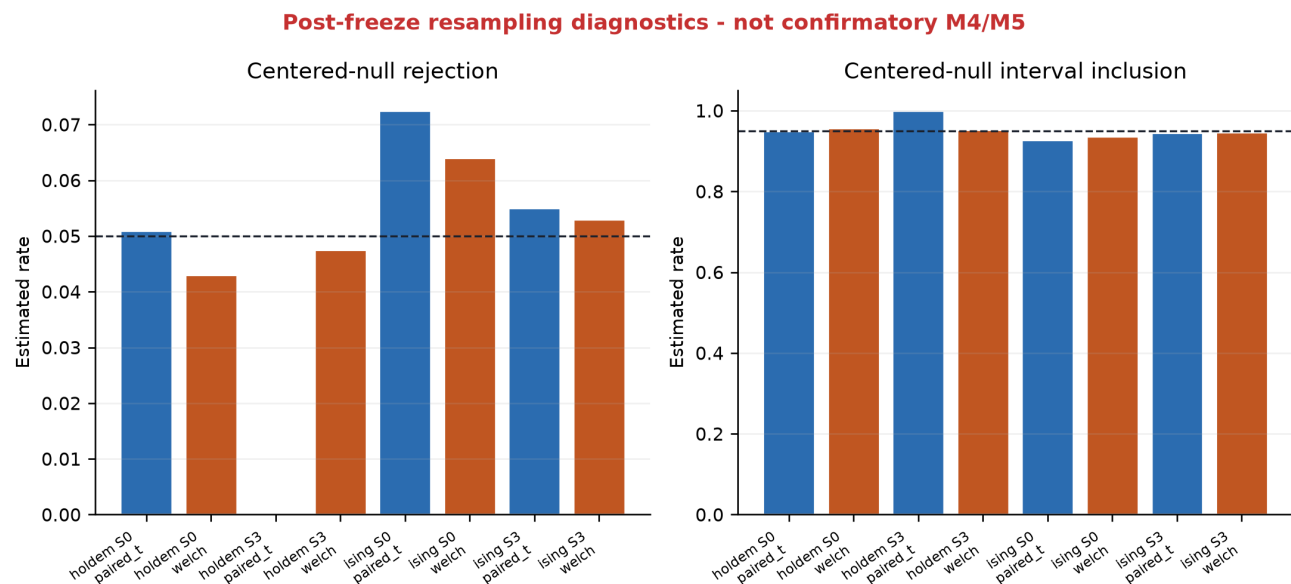

Figure 3 - Detection versus false suppression

Review question: Is the B7 failure and cross-system magnitude difference clear?

Reviewer initials: _____

Figure 4 - Statistical diagnostics

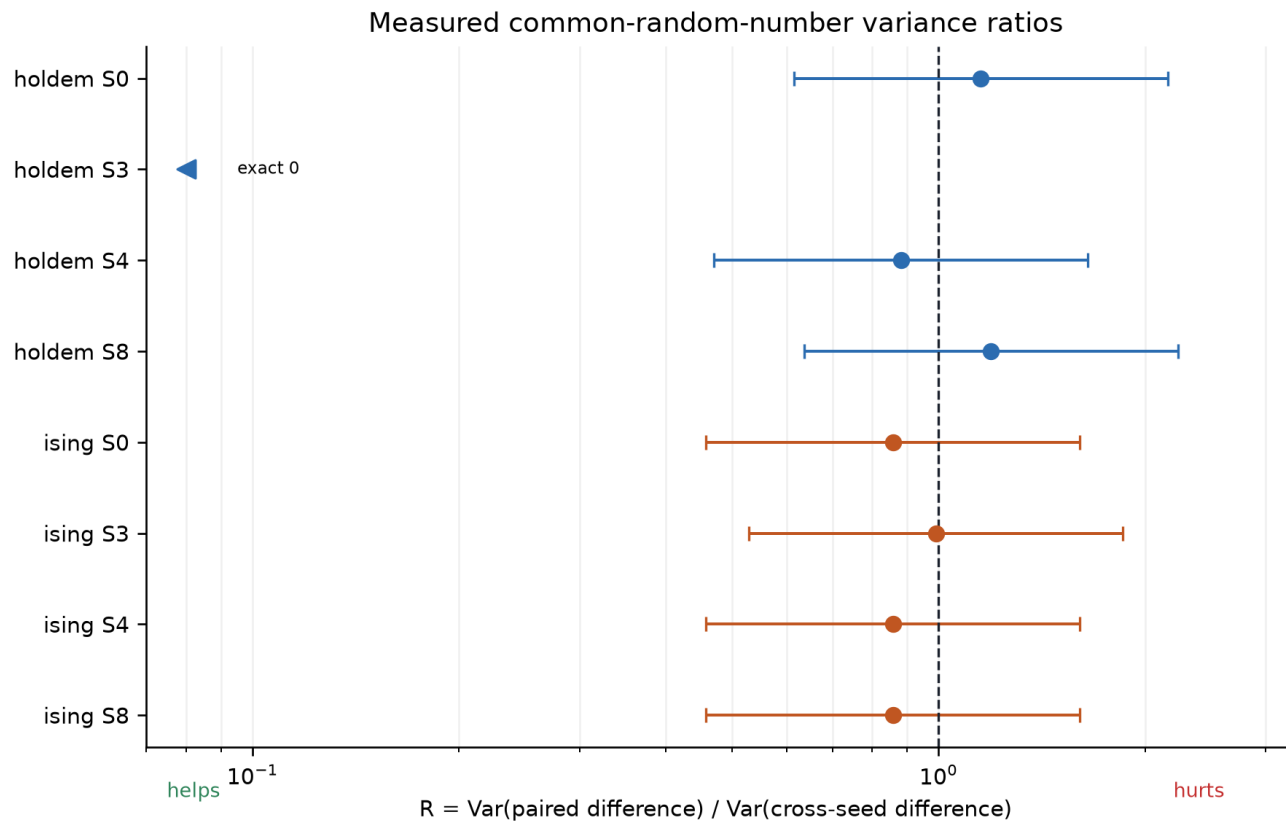

Promised A/A mirror and equal-temperature banks were not retained; bars use centered empirical proxies (B=2,000).

Review question: Is the non-confirmatory status impossible to miss?

Reviewer initials: _____

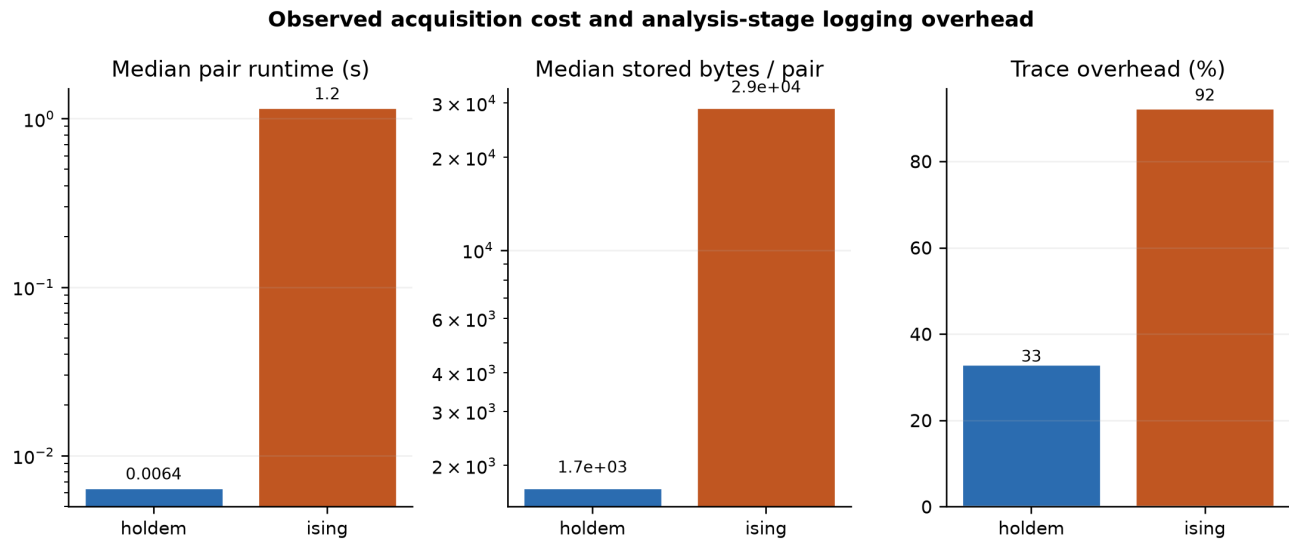

Figure 5 - Variance ratios

Review question: Is the exact-zero S3 point presented as a warning rather than a success?

Reviewer initials: _____

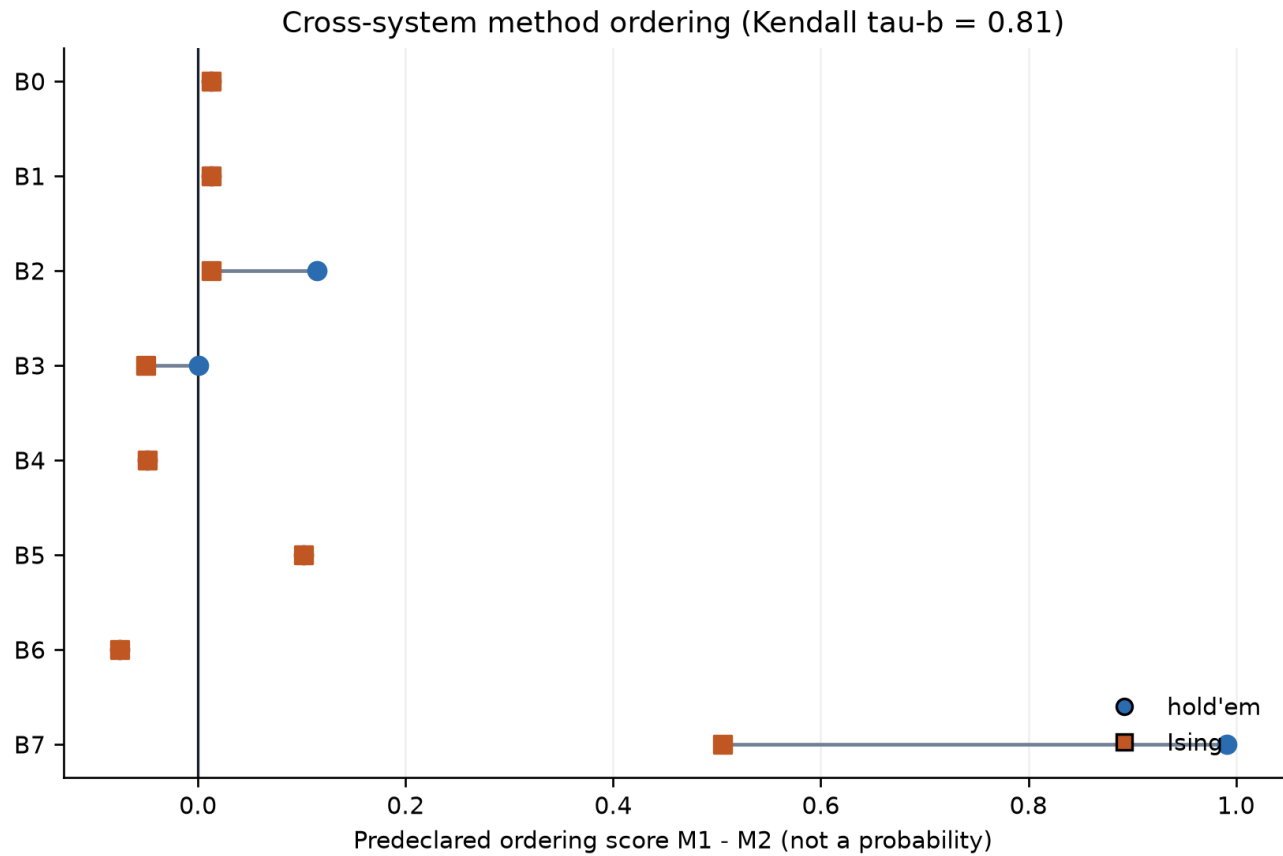

Figure 6 - Cost

Review question: Do you understand which costs are system-level rather than method-level?

Reviewer initials: _____

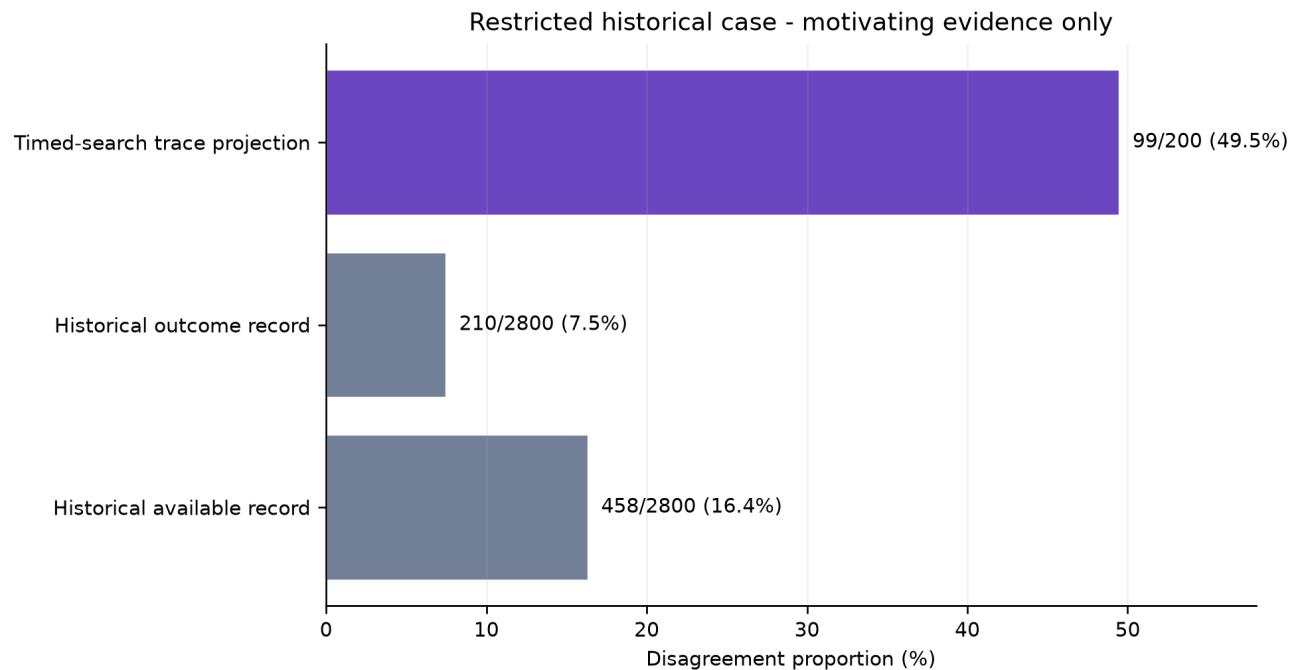

Figure 7 - Cross-system ordering

Review question: Is M1-M2 labeled as an ordering device, not a probability?

Reviewer initials: _____

Figure 8 - Historical motivation

Not pooled with the prospective benchmark; restricted materials and retrospective rules limit interpretation.

Review question: Is the restricted retrospective case visibly separate from prospective evidence?

Reviewer initials: _____
