

Construction-known ground truth by failure scenario and claim type

	A Descriptive	B Paired	C Replay	D CRN	E Event
S0 clean control	V	V	V	V	-
S1 seed namespace conversion (16-bit truncation)	X	D	V	X	X
S2 stateful draw shift (one extra burn draw in arm B)	V	D	V	X	X
S3 event-keyed repair	V	V	V	V	V
S4 clock-bounded computation (wall-clock think budget)	V	V	X	V	X
S5 process-global mutable state (worker reuse)	V	D	X	X	X
S6 queue/enqueue order dependence	V	D	X	X	X
S7 missing/dropped schedule rows before analysis	X	D	V	V	-
S8 benign residual randomness, valid repeated-measures design	V	V	X	V	X
S9 pseudoreplication (decisions treated as independent replicates)	V	X	V	V	-
S10 valid unpaired design (independent seeds, declared)	V	X	V	X	X

V valid

D downgrade

X invalid

- not applicable
